Troubleshooting

“I cannot connect to the Internet”

- Please check the Wi-Fi connection on your device such as PC or smartphone.
- If your Wi-Fi is connected to your device, check the reception level on top left of the Wi-Fi. If the signal is poor, try moving to the place in good signal.
- If your problem is not be solved, try resetting your Wi-Fi router.

“The connection is unstable.” “The Internet is slow”

- The actual speed differs depending on time and locations. Please try again later.
- If monthly data usage exceeds your data plan, the data transfer speed can be slow down. Please check your data usage on the menu icon of your Wi-Fi.
- If your problem is not be solved, try resetting your Wi-Fi router.

“My Wi-Fi won’t turn on”

- The battery may run out of battery. Try re-charging your Wi-Fi at least half an hour, and hold the power button for 5 seconds.
- Try pulling out the built-in battery and replace it.
- * Detach the back cover by putting your nail on the top right of the back cover and you will see the built-in battery.

How to Reset

When something is wrong with your Wi-Fi, try resetting it. Temporary failure will be cleared.

1. Turn the router on.
2. Detach the back cover by putting your nail on the top right of the back cover.
3. Hold the reset button for 5 seconds.

* Tips after reset

- Tap on [次へ] 3 times, and tap on [利用開始].
- To set the language, select the gear mark on the screen and scroll the entries down to Language Setting.

Wi-Fi Spot

Wi-Fi Spot Service is to use public Softbank network via 601HW router. Our rental Wi-Fi router does not support this service. Please use your router with Wi-Fi Spot set off.

WEB UI

- Access to WEB UI, and change your settings in detail .
1. Connect your Wi-Fi to your PC or smartphone.
 2. Type “http://web.setting” on the URL bar of your PC.
 3. Change the website language to English
 4. Click “Log in”. The password is “admin”.
