

# WiFi Setup Start Guide

SoftBank  
**FS030W**

Please read the instructions.

Please check what is inside the package before getting started.

- Confirmation of the Contract
- Wi-Fi router
- AC adapter
- USB cable
- Pouch

- Return Envelope (Letter Pack)

**If by any chance there is anything that is not included in your package upon receipt, please contact us.**

## Getting started

1. Press the power button, and hold it for 3 seconds.

Keep holding the power button until "FUJISOFT" is displayed on the screen.

2. Select the network on your PC or smartphone.

Select SSID beginning with "FS030W...".

3. Enter the password on your PC or smartphone.

**You can access the Internet once you join the network.**

\*Up to 7 devices can be connected at the same time.

## Set up

### ■ Connecting iPhone, iPad and Android

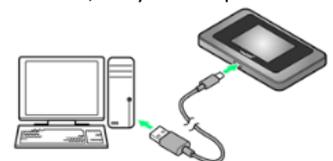

1. Tap on "Settings" icon.
2. Select "Wi-Fi".
3. Turn on "Wi-Fi".
4. Select the network "FS030W...".
5. Enter password.
6. Done!

### ■ Connecting a Windows 10 PC

1. Click the "Network" icon on the task bar on the lower right of the PC screen.
2. Select the network "FS030W...".
3. The network security key input screen will be displayed. Enter the password, then click "Next".
4. Click "Yes" at the sharing setting confirmation screen.
5. It's done when "connected" is displayed.

### ■ Connecting PC via USB

You can access to the Internet automatically when you connect your PC to the WiFi router via USB cable. If not, it's probably because of your PC settings. Please contact to your PC Support Desk, or system department at your company.

\*For more information, please turn over page.

## Troubleshooting

Please read before inquiry.

### ■ "I cannot connect to the Internet"

- Please check the Wi-Fi connection on your device such as PC or smartphone.
- If the connection is not completed, please connect to the Wi-Fi router with your device.  
If "1" is displayed on Wi-Fi screen, one device is connected.
- Please check the signal strength on the screen when you cannot access the Internet, even your device is connected with the Wi-Fi router. If the signal is poor, try moving to the place in good signal.

### ■ "The connection is unstable" "The Internet is slow"

- The actual speed differs depending on time and locations. Please try again later.
- If monthly data usage exceeds your data plan, the data transfer speed can be slow down.

### ■ My Wi-Fi won't turn on

- The battery may run out. Try re-charging your Wi-Fi at least half an hour, and hold the power button for 5 seconds.
- Try pulling out the built-in battery and replace it.  
(It's possible to slide open the back cover to the direction of ▷.)

## Reset

When something is wrong with your Wi-Fi, try resetting it.  
Temporary failure will be cleared.

1. Open the back cover with the power on.  
(Slide the back cover to the direction of ▷.)
  2. Press and hold the reset button for 5 seconds using something like a pointed top.  
⇒ Return to the state of factory setting.
- \*Although the data usage on the screen is cleared, the actual data usage is not reset.

Reset button

- Please reset with the power on necessarily.
- Please press and hold the reset button using something like a pointed top.

## Display

Details are displayed on the screen by pressing the power button.

Please refer to the following about details.

- ① Wi-Fi  
\*The number is a client list
- ② Bluetooth
- ③ Signal Strength
- ④ Battery Life
- ⑤ Data Usage

## Data Plan

### ■ Over Data Quota

When your data usage limit is reached, the speed limit is unavoidable.  
The speed recovers at the beginning of following month.  
Please rest assured that there are no charges for the data exceeding the limit.

\*Please place a new order for another device until the end of month if you ask for the normal speed in the same month.  
(It costs delivery fees because of a new order)

\*The shortening of rental period for over quota is not accepted.
